What is acetate?

Acetate is a plastic derived from wood pulp. Since acetate is plant-based, it's environment-friendly and renewable-unlike petroleum-based plastics. Acetate is also hypoallergenic, so it's an ideal frame material for people who have allergies or sensitive skin.

They are suitable for various ages, facial shapes, genders, and other aspects. Now, Healthy Eyes with Stylish Looks Gets Easier and Saves More! Prove It Yourself!

Built in lenses are neutral without power (no grades) and are equipped with Anti Ultra Violet (UV), Anti Bluray, and Anti E.M.D (Electromagnetic Radiation) layers.

For maximum result,
wear it for 8 – 10 hours
every day

Remarks

For optimal results, it is recommended to wear 8-10 hours per day, and it is still suggested for regular check-up to an ophthalmologist should a complaint occurs.

The default lenses of these glasses are NEUTRAL . So if the consumer has far/near sighted, astigmatism, etc, it is recommended to change the lens of the glasses according to their eye complaints at the nearest optical store.

How to take care / clean MGIClub IonSpec Glasses

- For the glasses frame, you can just wipe it with a wet cloth and then dry it with a clean cloth.
- For the lenses, you can use mild soap or special cleaning liquid use for lenses (can be purchased at optical shop). Then wipe using a soft clean cloth.
- Avoid contact with salt/sea water or anything that contains alcohol (perfume, sanitizer, etc)
- Do not place the glasses under direct hot sunlight or place such as car dashboard, motorcycle seat, and do not dry it under the sun. Store in a cool dry place.
